

THE APOLLO

PAINT YOUR WORLD
WITH LIGHT

HOW TO LOCK / UNLOCK & BASIC FUNCTIONS

The first time you open your Apollos, they will be in LOCK mode.

To LOCK – Make sure light is off. Hold button down until **ALERT RED** flashes, release button immediately. Your light will then be locked.

To UNLOCK - Hold button down until **ALERT RED** flashes, release button immediately. Your light will now be **on**.

To TURN ON light, click button while light is off.

To TURN OFF light, hold the button in any Colorway until the light turns off, then release immediately.

To CYCLE through colorway slots click button while the light is on.

DEFAULT COLORWAYS

There are 6 Colorway Slots

To the right are the default Colorways that come installed on your Apollo lights.

You can customize each Colorway with ONE Flashing Pattern and up to SIX Colors with THREE brightness levels per color.

1	Turquoise	High
2	For. Green	Low
3	Turquoise	Medium
4	For. Green	High
5	Turquoise	Low
6	For. Green	Medium

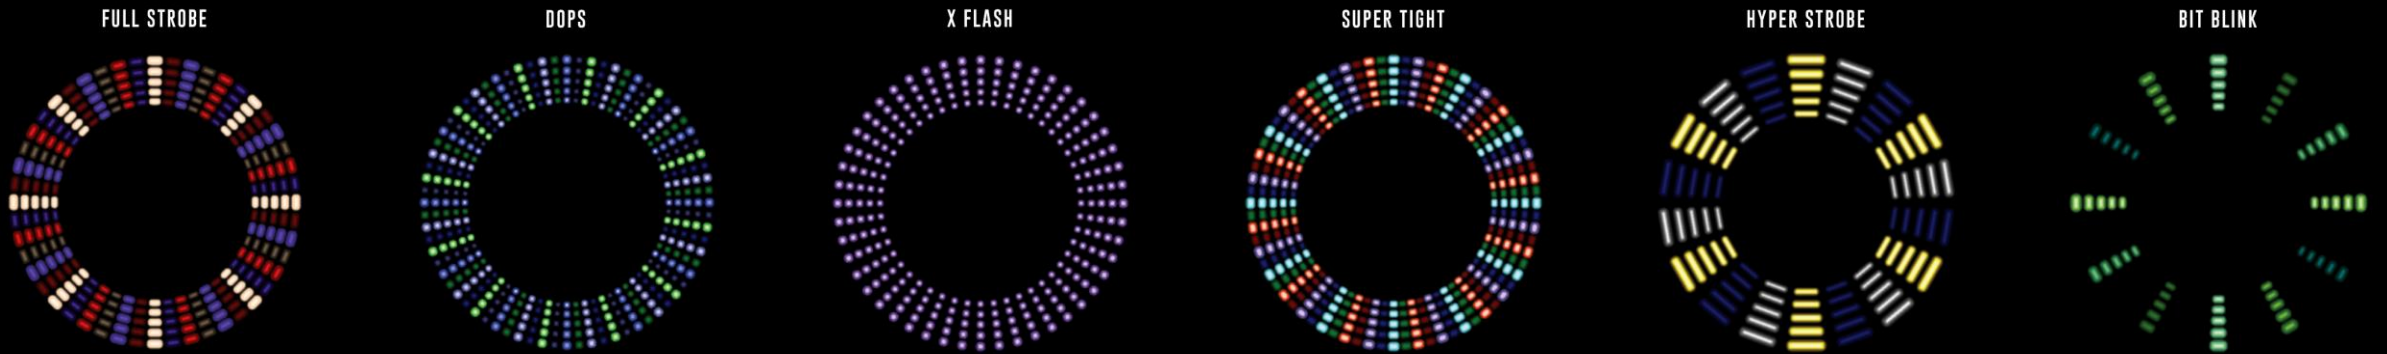

COLOR SELECTION

You can customize each Colorway by choosing up to 6 of the above colors:

1. Turn the light on and cycle to the colorway you want to customize. Hold button until **ALERT ORANGE** flashes and release. Blank (**FLASHING WHITE**) will display. You are now in color selection mode.
2. Click button until you reach the color you want to select.
3. To select the color on High Brightness hold button for one second and release after one blink. For Medium Brightness, hold an additional second and release after the second blink. For Low Brightness, release after the third blink. (Blank only has one brightness option.)
4. Your color will blink once and will return back to Blank. You have now selected your first color.
5. You can repeat this process to select up to SIX colors or as few as ONE color.
6. To save changes and finish Color Selection, cycle to Blank, hold button until **ALERT RED** flashes, release to exit.
7. To quit Color Selection without saving changes, hold the button down for TWELVE seconds until the light turns off, or simply leave it inactive for THIRTY seconds.

FLASHING PATTERN SELECTION

*example colors based on default colorways

You can choose one of the above Flashing Patterns for each Colorway.

1. From ON mode, click button to until you reach the Colorway you want to change. Hold button until **ALERT BLUE** flashes, release. You are now in Flashing Pattern Selection mode.
2. You will see the Colorway's currently selected colors in the Full Strobe flashing pattern.
3. Click button to cycle through the 6 flashing patterns. Once on desired pattern, hold button for three seconds until light flashes **ALERT ORANGE**, and release. You will be returned to the Colorway in ON mode with your new flashing pattern.
4. Holding button past alert orange will return you back to pattern selection mode.
5. To quit Flashing Pattern Selection without saving changes, hold the button down for TWELVE seconds until the light turns off, or simply leave it inactive for more than THIRTY seconds.

FACTORY RESET

Use factory reset when you want to reset your Apollos to its original default modes.

1. When light is off, hold button for five seconds until flashing **ALERT WHITE** appears, release immediately.
2. A **PURPLE** color will flash when the reset is completed. The light will turn OFF.

3, 2, 1, LIFTOFF...

Enjoy your Apollos!
